

How to help hedgehogs!

HEDGEHOG STREET 

CITY OF WILDLIFE

Make a WILD corner by letting the grass and wildflowers grow, you can add branches and leaves too. This will create a buffet of insects for hedgehogs to eat, and materials to build a nest.

Bed and breakfast!
You can buy or build your own hedgehog house to create a safe home in the garden. Extra food and water will also help hedgehogs along. Meaty cat or dog food and shallow dishes of clean, fresh water will be perfect (just place them away from the hog house).

Ask your parent or guardian to help make your garden safe for hedgehogs by:

- not using chemicals
- removing litter or netting
- checking before strimming or mowing the lawn

Gardens need to be linked together via hedgehog highways – 13cm square gaps in or under fences (ask for help if you need to use any equipment).
